

ABSTRACT

5 A spray gun allowing paint in atomized state to be jetted from a
paint jetting part (3) provided in a body frame (5) by the operation of an
operating member (6), wherein an air jetting means (4A, 4B) for forming a
covering air flow surrounding the periphery of atomized paint jetted from
the paint jetting part (3) are formed in the thick-walled part or internal
10 space of the body frame (5), whereby the covering air flow can be formed by
the air jetting means (4A, 4B) in connection with the operation of the
operating member (6).
